

# Current status

- ▶ Endofullerene data reduction.
  - ▶ No SofQW, easier to compare results.
  - ▶ Surprise: Lamp adjusts  $\lambda$  in normalise().
- ▶ IN4 instrument definition.
  - ▶ On hold until detector configuration is checked.

### Sum in energy: Lamp vs. Mantid

### Sum over q: Lamp vs. Mantid

# Next sprint

- ▶ As always, add more data reduction steps.
- ▶ Check correctness of SofQW'd data by comparing the diffraction peaks to known values, for example.
- ▶ Visual inspection of IN4 detector configuration with Björn.
