Current status

- `DetectorEfficiencyCorUser`
    - Heuristics to choose between $E_f = E_i - \Delta E$ and $E_f = E_i + \Delta E$.
    - However, fails when $-E_f < \Delta E < E_f$.
    - Plan: Always assume the same convention as the ConvertUnits algorithm.
- IN4 instrument definition
    - Rosace small-angle detector definition uncovered a bug in Mantid.
    - Fixed, merged.

Next sprint

- Investigate `He3TubeEfficiency` and `DetectorEfficiencyCorUser`
